Armstrong launches its project showcase A Book for 2016

Bold and colourful – that's Armstrong Ceilings' project showcase for 2016.

Bold use of a suspension system without any actual ceiling tiles in an airport and gold tiles that flow from the soffit through to the walls of a retail unit are just two of the stunning projects featured in Armstrong's [A Book](#) showcase for 2016.

The 94-page coffee table-style annual brochure takes readers on a grand tour of new-build and renovation projects in the UK, Netherlands, France, Italy, Spain, Turkey, Russia, Switzerland, Belgium, Germany, Latvia, Poland, Austria and Lithuania.

The 2016 A Book shows in eye-catching detail how Armstrong has called on its 150 years of expertise to deliver ceiling system solutions in a multitude of materials, shapes, colours and sizes for challenging applications in the retail, commercial, healthcare, education, transport and leisure sectors.

It delivers an inspiring visualisation of how Armstrong's peerless portfolio of floating and wall-to-wall ceilings and suspension and perimeter systems delivers solutions that are aesthetic, acoustic, healthy, sustainable and recyclable, and easily installed and maintained... and leaves readers wanting more.
