Armstrong Ceilings showcases European projects in its A Book for 2017

A coffee-table visual delight is published by Armstrong Ceilings.

Proof that ceilings are no longer an afterthought in the design and build process is contained within the glossy new [A Book for 2017](#) from Armstrong.

While they hide unsightly soffits, reflect light, help to control the air quality, acoustics and temperature of a building space, and resist bacteria, ceilings are now all this and so much more – stunning designs guaranteed to inspire no matter the environment.

And those stunning designs, dozens of them, are showcased within the 82-page coffee table-style brochure that snapshots new-build and refurbishments projects from the retail and leisure, education, office, healthcare and transport sectors throughout Europe.

UK projects include metal tiles and baffles at the National Biologics Manufacturing Centre in Darlington, Axiom Knife edge canopies with integrated lighting at CFC Underwriting's offices in London, wood tiles on a black bandrastrer grid at Global Mining and Resource Company's offices in London, and a bespoke orange metal ceiling and wall at The Contact Company's call centre in The Wirral.

Other European projects include metal baffles and open-cell metal ceilings at Ernst & Young in Poland, Optima canopies at Pitney Bowes in Italy, metal baffles at H&M's central European main store in Hungary and mesh metal ceilings for multi-media centre Mediathèque de Caen in France.

Armstrong's office in Prague also features in the book, with, understandably, the complete portfolio - mineral canopies and baffles, metal canopies, wood tiles and the first ceiling system comprising mineral tiles and grid to be awarded Cradle to Cradle certification.
