TACKLE COMMON JOB-SITE CONDITIONS WITH PRE-ENGINEERED SOLUTIONS

Time & Labor Saving Solutions + Ceiling Construction Expertise = Improved Construction Efficiency on the Job-Site

- Minimize the construction schedule
- Eliminate guesswork
- Reduce construction coordination

**WINDOW & SHADE POCKETS**
12X faster to install than drywall shade pockets and twice as fast as other pockets – controlled quality and costs.

**DIRECT & INDIRECT LIGHT COVES**
Install 90% faster with just 10% of the labor of traditional light coves.

**TRANSITIONS**
Cut weeks off the schedule – eliminate vertical framing to structure and reduce trade coordination.

**INTERIOR GLASS PARTITIONS**
Make glass disappear into the plenum – completely concealed integration without the need for a drywall bulkhead.
Tackle Common Job-Site Conditions with Pre-Engineered Solutions

Time & Labor Saving Solutions + Ceiling Construction Expertise = Improved Construction Efficiency on the Job-Site

- Minimize the construction schedule
- Eliminate guesswork
- Reduce construction coordination

Flat Drywall
3X faster to install than traditional track and channel framing. 4X faster for framing openings, such as air vents and lighting fixtures.

Curved Drywall
3X faster to install than traditional track and channel framing.

Soffits & Bulkheads
Maximize efficiency with off-site modularization – route holes and knockouts at 6" and 8" centers reduce measuring/cutting time.

Corridors
Span the gap in crowded or low plenum areas with reduced support.
