<tr>
<td>Fire Performance</td>
<td>Infusions panels have been tested according to NFPA 286 and are equivalent to Class A Interior Finish as defined by the International Building Code. Contact TechLine at 1 877 ARMSTRONG for specific US and Canadian fire performance data.</td>
</tr>
</tbody>
</table>

### Installation and Design Considerations

- Do not allow panel edges to get wet.
- Infusions panels are not approved for exterior application.
- Natural Linen and Blue Linen colors may vary panel to panel.
- Wall anchor hardware is provided by others. A minimum gap of 1/4" is required between panels. Panels are pre-drilled for Point Supports.
- Panels can be damaged by exposure to high temperatures. Panel temperature should not be permitted to exceed 100°F. There is potential for limited deflection of panels.

### Warranty
