

ProjectWorks®
Design and
Pre-Construction
Service

Armstrong®
World Industries

MetalWorks™ Torsion Spring Shapes; Papago Buttes Lobby

How can ProjectWorks® help you?

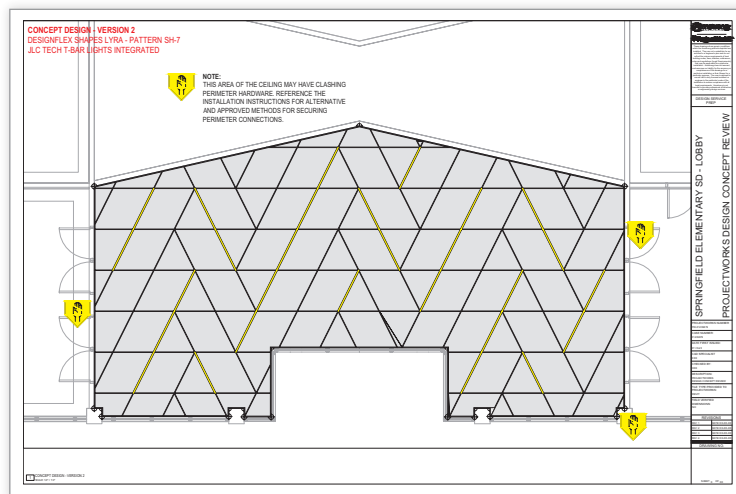

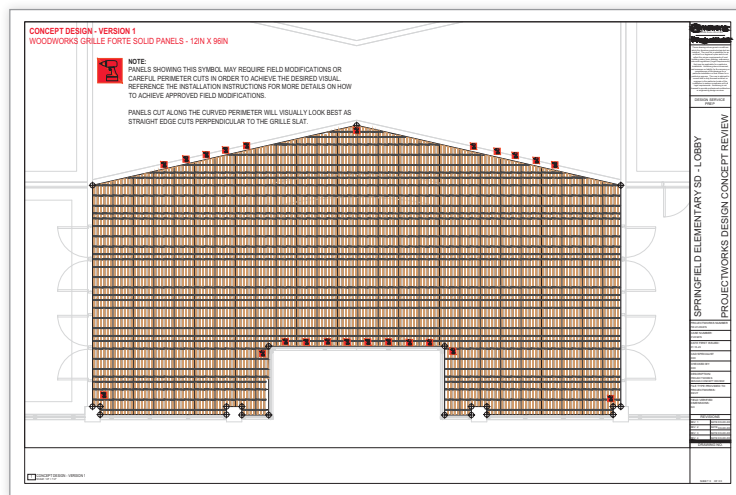

ProjectWorks® provides complimentary assistance to help simplify ceiling and wall layouts and deliver comprehensive drawing packages that streamline the entire project process – from design and quoting through takeoffs and installation.

Every project is unique with specific requirements. From small, standard product layouts to large, custom ceiling concepts, we support it all.

Standard Armstrong Solutions & ProjectWorks®

As your project journeys from schematic design through material installation, there are three unique services ProjectWorks® Design Service provides to support you through the various construction phases: Design Consultation, Design Service, and Pre-Construction Service.

ProjectWorks delivers basic layouts and material budgets to help you and your client evaluate solutions.

Design Consultation

When you are in early design and are looking for assistance in determining which products meet your needs, we provide Design Consultation. This service is intended to help you compare layouts and budgets that will assist you with finding the best solution moving forward.

Deliverables and Value:

- Upfront design consultation to collaborate on solutions that meet design intent
- Real-time visuals of different solutions and configurations within project
- Conceptual drawing package with basic RCP layouts and budget comparisons
- Ensure safe constructability of design by analyzing installation details of applied solutions

Standard Armstrong Solutions & ProjectWorks®

Design Service

When your project is in the design development or construction document phase, our Design Service can assist with layouts, specifications, and a defined materials budget to help you get your project ready for bid.

Deliverables and Value:

- Drawing package with panel, suspension, and hub layouts to improve project coordination
- Panel, suspension, and hardware schedules to reduce bid challenges
- Seamless integration of MEP and HVAC partner solutions within layouts
- Panel and Axiom® trim optimization capabilities to support sustainability goals
- Materials budget and specification guidance
- Revit® models to enhance ceiling visuals and evaluate MEP/HVAC integration

REVIT® model includes product data for the panels, suspension, and perimeter trim.

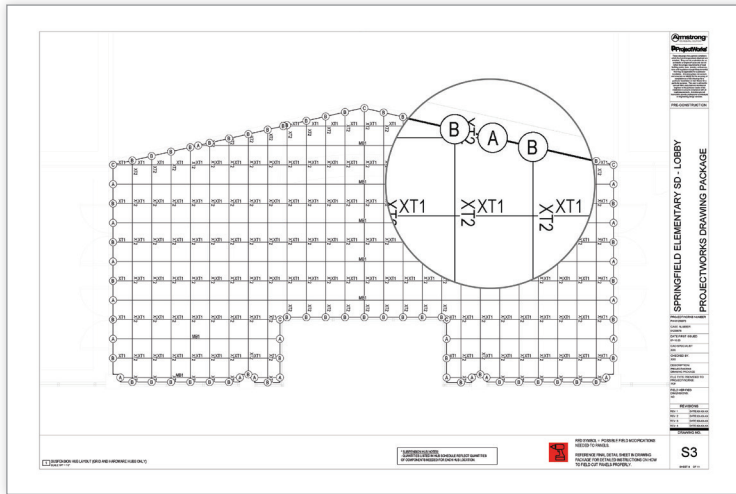

Drawing package contains layouts and schedules to help guide construction documents.

Standard Armstrong Solutions & ProjectWorks®

Pre-Construction Service

As your project moves into the bid phase, we provide a Pre-Construction Service to support bidding, ordering, and installation.

Suspension and hardware layout show exact location of each component.

Corresponding hardware details for added construction clarity.

Deliverables and Value

- Comprehensive Drawing Package with panel, suspension, and hardware layouts, showing exact location of each component throughout project space
- Panel modification tags, generic installation details, and accessory drawing details for added construction clarity
- Panel and Axiom® trim optimization capabilities, reducing cost and material based on realistic scrap reusability
- Bill of Materials with item numbers and quantities, carton sizes, and leftover material for easy ordering

Design Service for Custom & Boutique Solutions

Custom Design Support

For unique spaces that require custom products, ProjectWorks® Design Service can help develop your one-of-a-kind concepts into safe and manufacturable solutions. Let our streamlined set of deliverables address concerns you may have and help keep your projects on target and within budget.

Deliverables and Value:

- Collaborative design sessions to sketch concepts and align on intent
- Provide 'good-better-best' options for your design with 3D concept renderings and comparative budgets and lead times
- Project specific details and specifications to assist with submittals and increase confidence with how solutions will install
- Physical mock-ups and samples can be coordinated to ensure form and function meet your design and performance needs

ProjectWorks provides complete concept to installation support for your one-of-a-kind visions.

Automated Ceiling Solutions in ProjectWorks®

While ProjectWorks® will provide support for any ceiling application, there are specific Armstrong Ceiling Solutions that are included in our automated digital capabilities. This automation allows us to quickly generate design ideations, accurately optimize drawing packages, and efficiently integrate ceiling solutions and partner components within a ceiling system.
