

Experience, Above All™

Spring 2023

What's New

Armstrong®
World Industries

Experience, Above All™

Calla® Shapes for DesignFlex®

For over 160 years, Armstrong World Industries has gone beyond the products we produce to elevate the human experience within a space. From innovation and design-forward thinking to an exceptional commitment to quality and customer service, we raise the bar for healthy, productive, and enjoyable built environments.

Experience, Above All™ articulates a promise that goes beyond our products. It addresses innovation, design thinking, service orientation, and our commitment to quality.

Here's what's new for Spring

Why Does Indoor Environmental Quality Matter?

We spend roughly 90% of our lives indoors, and the past few years have highlighted how our well-being is directly affected by our physical surroundings. Indoor Environmental Quality (IEQ) consists of several key factors: air, sound, light, temperature, and more.

Making sure we have impactful acoustics, sustainable products, and efficient, inspiring designs are essential to health and well-being in spaces where we live, work, learn, heal and play.

Explore how you can create a space with outstanding IEQ, starting at the ceiling, when you choose sustainable, healthy building solutions.

AcoustiBuilt® Seamless Acoustical Ceiling System with Axiom® Trim

Total Acoustics®

Sound Absorption (NRC) + Sound Blocking (CAC) = Total Acoustics

Calla® Health Zone™ ceiling panels

Ultima® Tegular HRC ceiling panels

Total Acoustics® ceilings provide the ideal combination of sound absorption and sound blocking in one panel. With three levels of sound absorption and high sound-blocking performance, Total Acoustics ceiling panels make it easy to choose the right ceiling for every space, every time.

- **BEST: NRC 0.80+ and CAC 35+**
- **BETTER: NRC 0.70-0.75 and CAC 35+**
- **GOOD: NRC 0.60-0.65 and CAC 35+**

Request a complimentary custom acoustical report to see the difference the perfect combination of sound absorption and sound blocking can make on your next project.

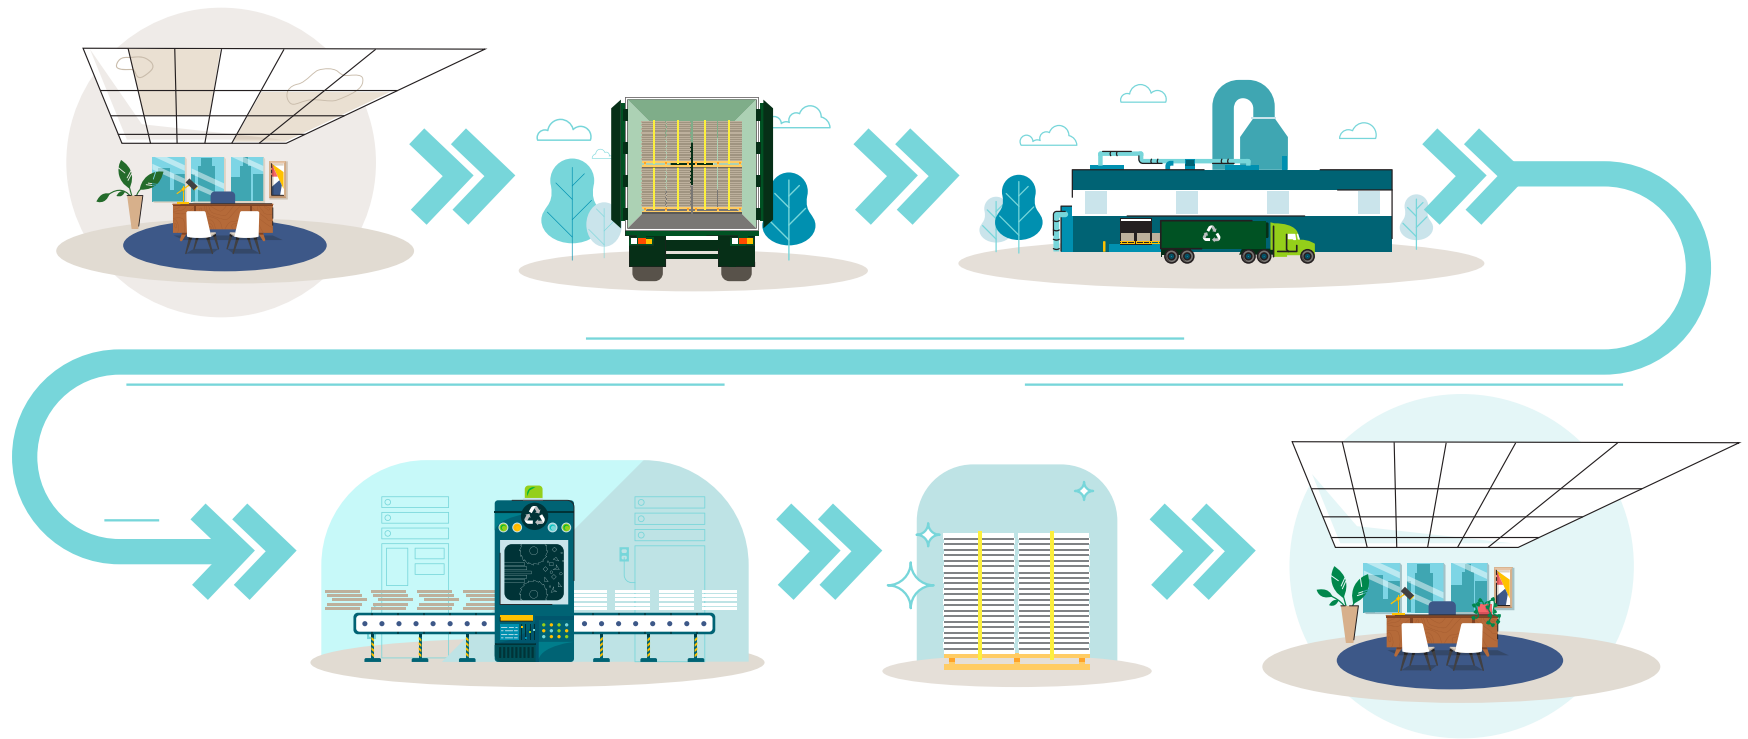

Ceilings Recycling Program

Since 1999, the nation's first ceilings recycling program has diverted over 200 million square feet of old ceiling materials from going to the landfill.

- Provides an efficient solution to reduce construction waste and embodied carbon on commercial renovation projects
- Ceilings are processed to become the foundation for the next generation of ceilings with higher post-consumer recycled content
- Make the Armstrong Ceilings Recycling Program part of your next commercial renovation or tenant improvement project and let's create healthy, sustainable spaces together

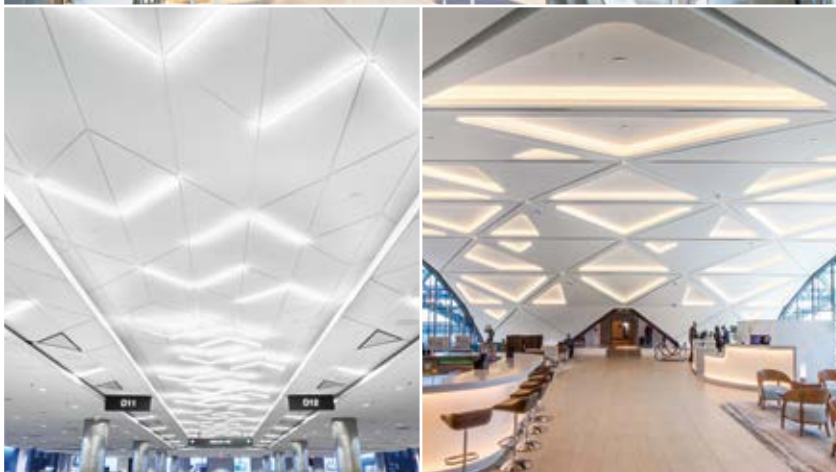

Call the Armstrong Ceilings Recycling Center at 877 276-7876 (option 4) to approve material and for assistance in facilitating recycling.

STANDARD COLORS

^{new} FELTWORKS® Blades – VARAFFIX™

Linear Acoustical Panels – Reinforced Rectangular

- Blades are reinforced at the top for enhanced structural integrity
- 12 standard neutral colors
- Standard 10' long blade option allows for better linear runs
- Embedded threaded connectors for installation versatility: cable-to-deck independent suspension, threaded rod, and direct to 15/16" Prelude® grid
- Part of the Sustain® portfolio of products

High Performance Sustainable
Ceiling Systems

new

new

new

Clean Room™ Suspension system has an integral gasket specifically designed for clean rooms, food processing areas, and data centers.

- Part of the Sustain portfolio
- Non-PVC and red list-free
- Border Hold-down Clip provides enhanced performance and visual at the perimeters
- Available in aluminum and steel

DYNAMAX® PLUS

Structural Grid System

Provides the accessibility and flexibility of DynaMax® structural grid, PLUS even greater load-carrying capacity and construction efficiency.

new

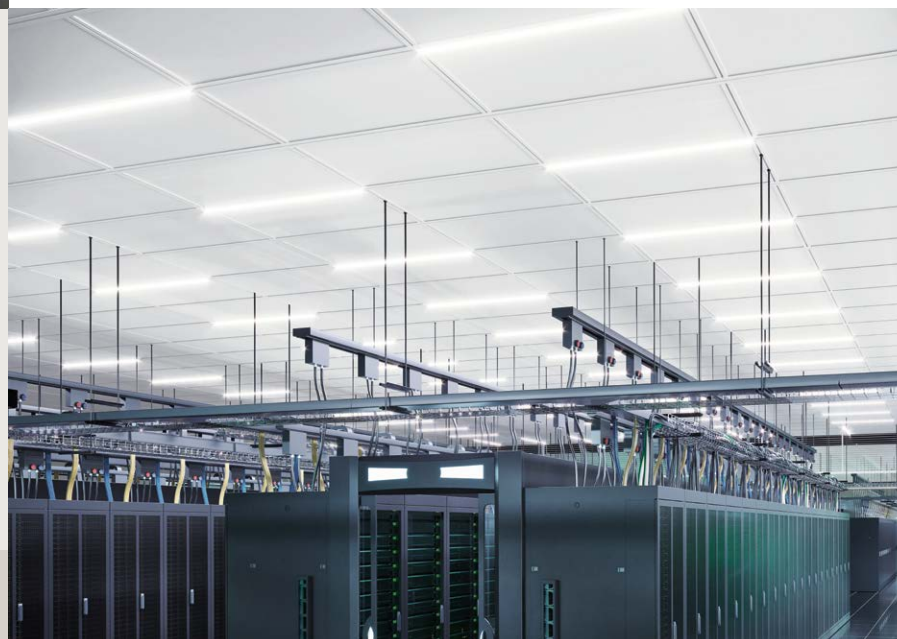

- Reduce material on your project by eliminating up to 1/2 the threaded rod drops with 6' and 8' spans

new

- Supports mid-span point loads of over 1,090 lbs. at L/360 deflection (up to 1,750 lbs. for static point loads)
- Part of the Sustain® portfolio and meets the most stringent industry sustainability compliance standards today
- Compatible with the same ceiling panels and accessories as today's DynaMax system
