PLASTERFORM™

GRG
CAST
STONE
GFRC
FRP
From unexpected architectural details to more practical applications, Plasterform™ architectural castings offer a broad range of materials to address design needs. Plasterform castings are available for interior and exterior use, and they're lightweight, yet strong, durable, and easy to install. We have assembled an extensive number of standard molds and this catalog has been produced to help you choose the right mold for your project.

INDEX .................................................................................. 79
This catalog showcases the molds we have readily available. In selecting from these molds, tooling costs will be reduced and deliveries expedited.

The following should be considered when specifying or ordering products from this catalog:

1. Materials Available
   - **GRG** – Glass Fiber Reinforced Gypsum
     - Interior
     - Requires field taping and finishing
   - **CAST STONE** – Interior Molded Stone (IMS)
     - Interior
     - Prefinished simulated stone
     - Requires joint caulking or grouting or exposed joints
   - **GFRC** – Glass Fiber Reinforced Concrete
     - Exterior paint grade or prefinished
     - Requires joint caulking
   - **FRP** – Glass Fiber Reinforced Polyester Resin
     - Exterior
     - Interior
     - Requires joint caulking and field finishing

2. When specifying a mold, enter shape number followed by product material and color.

3. All bids must be factory prepared since product material, quantities, speed of delivery, project location, and availability of molds will influence the final price.

4. Shop drawings will be submitted for approval on all projects.

5. Products are not stocked. All components are fabricated only after order and approvals are received.

6. Moldings and Light Coves are generally interchangeable.

7. Where curved shapes are required, custom molds are required.

8. Rarely can the shapes shown be extended. However, it is, at times, possible to use only part of a mold.

9. Contact factory to verify availability of molds, as they can deteriorate due to use.

10. Detailed drawings are available on our website at armstrongceilings.com/plasterform
GRG
Glass Fiber Reinforced Gypsum (GRG) is a composite consisting of alpha gypsum cement and water, reinforced with glass fibers – an ideal choice as an economical, lightweight, and durable replacement for traditional plaster.

GRG can be effectively used to create columns, domes, vaults, coffers, light coves, moldings, and much more.

CAST STONE
Cast Stone is an interior molded stone (IMS) composite consisting of alpha gypsum cement, pigment, aggregate, water, and polymers.

Cast Stone can recreate the look of natural stone for interior use in columns, cornice, trim, demising piers, flat panels, pediments, door surrounds, fireplaces, and more. It is available in 12 standard colors and custom colors. Before leaving the factory, a clear sealer with a satin finish is applied.

GFRC
Glass Fiber Reinforced Concrete (GFRC) is a lightweight composite consisting of Portland™ cement, sand, aggregates, alkali-resistant fiber, polymer, additives, and water. Glass fibers reinforce the product, resulting in a much stronger material than normal concrete.

It is typically an exterior product, but can also be used for interior applications. GFRC can be integrally colored or paint grade. It is available in 12 standard colors and custom colors. GFRC can be used for columns, cornices, friezes, wall panels, domes, finials, pediments, balustrades, and more.

FRP
Glass Fiber Reinforced Polyester Resin (FRP) is a composite consisting of gelcoat, polyester resin, and glass fibers. The resin is a byproduct of oil, natural gas, sand, and other minerals.

FRP is an exterior product and can be made into shapes such as columns, cornices, domes, panels, planters, and cupolas.
COLUMNS

Make a bold impression with Plasterform™ columns. Materials can be customized to most shapes, sizes, or finishes to give your columns just the right look to fit your architectural style. Recreate the visual of natural stone for columns that will stand the test of time.
Plasterform™ GRG custom backlit columns; Harrah’s Casino, Joliet, IL; Hnedak Bobo Group and Friedmutter Group
INSTALLATION DETAILS

Plan View of Column

GRG Column Joint

Countersink stainless steel fasteners @ 16" O.C. (Max) as required by installer

All framing, shims, and fasteners as required by installer

Washer/stainless steel fasteners @ 16" O.C. (Max) as required by installer

Construction adhesive supplied and applied by installer

FRP Column Joint – Monolithic

FRP Column Joint – Sealant

Apply mesh tape, fill with Bondo®, and finish as required by installer

Sealant as required by installer

Return flange

Backer rod and sealant as required by installer

Steel framing, plastic shims, and stainless steel fasteners as required by installer

Pre-drill and countersink fasteners, patch screw heads with cementitious compound by installer
