AcoustiBuilt® Seamless Acoustical Ceiling System

Wall system available

AcoustiBuilt Ceiling System in Black
Fine-Texture Finish

New seamless acoustical ceiling and wall system that looks like drywall, but offers Total Acoustics® performance.

KEY SELECTION ATTRIBUTES

- The look of drywall in a seamless acoustical ceiling and wall system (install on walls above 7 feet to prevent damage)
- Get total noise control and floor plan versatility with Total Acoustics® ceiling panel options: NRC + CAC = Total Acoustics performance
- Finished AcoustiBuilt® panels are part of the Sustain® portfolio and meet the most stringent industry sustainability compliance standards today
- Smooth non-directional, monolithic, drywall-like visual
- Custom colors available to meet your design palette

- AcoustiBuilt® is intended for spaces desiring a Level 4 equivalent drywall finish
- Install on FrameAll™ Drywall Grid, in any room, any size – flat or sloped
- Similar installation and finishing methods to drywall ceilings
- CleanAssure™ family of products – includes disinfectable panels, suspension systems, and trim
- Mold- and mildew-resistant surface
- Use Drywall Grid SimpleSoffit® framing system for faster, easier soffit construction
- Use AcoustiBuilt® system for open-air plenum applications
- Easier to install than acoustical plaster at a lower cost
- Can be installed with most drywall-compatible light fixtures including those from our partners:
 - Axis - XAL
 - USAI® - Price®
- Improves STC of interior stud/drywall partition systems by up to 6 points
- Seamless integration with VidaShield UV24™ Air Purification System

TYPICAL APPLICATIONS

- Offices
- Lobbies
- Education
- Exposed Structure
- Retail
- Hospitality
- Cloud Applications

FINE-TEXTURE FINISH FOR ACOUSTIBUILT PANELS

PHYSICAL DATA

Material
Wet-formed mineral fiber.

Fire Performance
Class A: ASTM E84 and CAN/ULC S102 surface burning characteristics. Flame Spread of 25 or less. Smoke Developed of 50 or less.

ASTM E1264 Classification
Type IV, Form 2, Pattern G
Fire Class A

Humidity/Sag Resistance
HumiGuard® Plus ceiling panels are recommended for areas subject to high humidity, up to, but not including, standing water and outdoor applications.

Anti-Mold/Mildew
Ceiling panels with BioBlock® performance resist the growth of mold and mildew on the panel surface.

High Recycled Content
Contains greater than 50% total recycled content. Total recycled content based on product composition of post-consumer and pre-consumer (post-industrial) recycled content per FTC guidelines.

VOC Emissions
GREENGUARD Gold Certified
Third-party certified compliant with California Department of Public Health CDPH/EHLB/Standard Method Version 1.2, 2017. This standard is the guideline for low emissions in LEED®, WELL Building Standard®, Living Building Challenge® (LBC), CalGreen Title 24, ANSI/ASHRAE/USGBC/IES Standard 189; ANSI/GBI Green Building Assessment Protocol.

Design and Lighting Considerations
AcoustiBuilt® panels are intended for spaces desiring a Level 4 equivalent drywall finish. Like Level 4 drywall, critical or low-angle light grazing across the ceiling can show imperfections. Special attention to finishing and sanding may be required. Downlights can complement the appearance in severe grazing light.

Installation is similar to standard wallboard and drywall suspension systems. However, it requires more precision and a higher level of finish to achieve an acceptable appearance. Lighting conditions can magnify surface imperfections, especially natural light that shines from oblique angles. It is strongly recommended that a job site mockup be constructed with representative lighting so that expectations regarding the finished appearance are managed.

Lighting and diffuser fixtures must be able to accommodate 7/8" thick panels. Contact the lighting and diffuser manufacturers for recommended fixture use and integration. AcoustiBuilt is a non-accessible ceiling. Access panels can be integrated, as needed, following standard installation practices. Refer to access panel manufacturer to verify compatibility with 7/8" thick panels.

PRODUCT CERTIFIED
FOR LOW CHEMICAL
EMISSIONS

UL 2818

Acoustical Considerations
When installed as a cloud, average sound absorption is 0.80 Sabins/SF. The addition of acoustical infill panel item 8200T10 can increase sound absorption up to 1.33 Sabins/SF. Excessive integrations and/or small enclosed spaces where the ceiling is more compound than open area will result in degradation of sound absorption. Certain lighting conditions and/or colors may require an additional coat of fine-texture finish, resulting in a degradation of sound absorption. AcoustiBuilt panels absorb the most sound when installed as full panels. Plan the layout to minimize panel joints and fixture integrations which cover the surface of the ceiling.

Insulation Value
R Factor – 2.2 (BTU Units)
R Factor – 0.39 (Watts Units)

LIGHTING AND MEP INTEGRATION

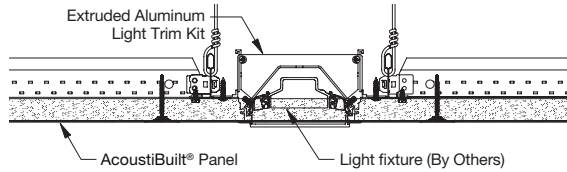

AcoustiBuilt® installed on FrameAll™ Drywall Grid offers comparable compatibility to standard drywall and easily accommodates a wide variety of conventional and integrated lighting solutions from Armstrong lighting partners. Additional options include standard industry lighting that complements the module size, or pendant fixtures that hang below the ceiling system.
