An interior panelized torsion spring metal ceiling system in a variety of linear configurations, achieving an accessible, smooth monolithic or open reveal linear look installed up to twice as fast as individual plank systems.

KEY SELECTION ATTRIBUTES

- 21 standard 24" x 96" panels with multiple linear planks in varying heights and widths with planks per panel configurations
- Four new Sequels™ pre-coat, wood-look finishes are part of the FAST134 program
- MetalWorks™ FASTPeel™ panels feature an easier-to-remove protective film
- Nominal 4", 6", 8", 10", and 12" wide planks with 1", 2", 4", 6" or 8" heights
- 24" x 96" torsion spring panels install up to twice as fast as individual linear plank systems
- Durable, downward accessible system – quickly open a large area with full panel removal
- Mix and match standard panels with alternating plank heights or widths for a custom look
- Smart design – reveals between planks are equidistant panel-to-panel; Panels have a consistent 1/8" reveal end-to-end
- MetalWorks™ Immix™ panels are part of the Sustain™ portfolio, and meet the most stringent industry sustainability compliance standards today
- CleanAssure™ family of products – includes disinfectable planks, suspension systems, and trim
- Select products included in the FAST134 program – ready to ship in 4 weeks or less
- Panels can be field cut; perimeter cut kit and additional end caps are available for a clean, professional finish
- Black acoustical infill panels hide the plenum and achieve up to 0.95 NRC
- Get total noise control and design flexibility with Total Acoustics™ ceiling panels: NRC + CAC = Total Acoustics
- Aluminum planks with exceptional durability – washable, scrubbable, soil-resistant

PHYSICAL DATA

Material
Aluminum – thickness 0.032"

Surface Finish
Painted: Factory-applied polyester paint.
Sequels™: Pre-coated coil. Custom colors and finishes available. Contact ASQuote@armstrongceilings.com for custom finish requests.

Fire Performance
Painted and Sequels finishes: Class A: Tested per ASTM E84. Flame Spread Index 25 or less. Smoke Developed Index 50 or less. CAN/ULC S102 surface burning characteristics. Flame Spread Rating 25 or less. Smoke Developed Classification 50 or less.

Acoustical Options
Perforated panels are supplied with a black fiberglass fleece to absorb sound.

Design Support
For custom design assistance contact ProjectWorks® Design Services or visit armstrongceilings.com/projectworks

Design Considerations
When installed, panels hang either 2-3/16", 3-3/16", 5-3/16", 7-3/16" or 9-3/16" below the face of the grid, depending on the height of the plank. MetalWorks™ Immix™ Linear panels can be cut in the field, see installation instructions for details.
Variation in reveal between panel ends up to 1/16" may occur.
Black 360® grid minimizes grid visibility. Axiom trim colors coordinate but are not an exact match.
For optimum visual design, backlighting panels is not recommended. For lighting integration see installation instructions.

Installation Considerations
Although panels are installed from below and never travel into the plenum, MetalWorks Immix Linear panels will require a minimum 5" clearance above the suspension system. This allows enough room for the springs to travel into the plenum space during installation or removal.

Seismic Restraint
MetalWorks Immix panels are approved for application in all seismic areas when installed per the seismic guidelines in the Armstrong Ceilings installation instructions.

Cleaning and Disinfecting
Cleaning and CDC-approved disinfecting options available on armstrongceilings.com/cleaning

Warranty
Details at armstrongceilings.com/warranty

FAST134 Program Considerations
Size of Job Matters: Big jobs, over 2500 SF or 50 pieces for shapes/vertical elements will have longer lead times.
Location Matters: Transit time not included. We are ready to ship in 1 week on FAST1 items. However, transit to the states west of Wyoming may add time.
Distributor Truck Schedule Matters: We rely on distribution to help move products around the country. When speed matters, work with your local distributor to ensure FAST134 service.
Stock vs. Made-to-Order Matters: FAST3 & FAST4 items are made-to-order and will ship direct to distributor. FAST1 (stocked items) will go through distribution and depend on distributor truck schedules.

Weight
