MetalWorks™ Torsion Spring Shapes Pattern TSSH8 downlight integration with 2D parallelograms, squares, and triangles in Whitelume

Create a custom, signature look with standard MetalWorks™ Torsion Spring Shapes ceiling panels in 2D or 3D patterns.

KEY SELECTION ATTRIBUTES

(new) • Precise factory-cut downlight panels are fit and finish certified to work with USAI® Lighting BeveLED® 2.2 and BeveLED® Mini trimless downlights

(new) • MetalWorks™ FASTPeel™ panels feature an easier-to-remove protective film

• MetalWorks™ Torsion Spring Shapes are part of the Sustain™ portfolio and meet the most stringent industry sustainability compliance standards today

• CleanAssure™ family of products – includes disinfectable panels, suspension systems, and trim

• Fifteen 2D standard shapes and sixteen 2D square and rectangle shapes that install in 24" module

• Three 2D hexagon shapes including perimeter solutions that install in 30" module

• Three 3D triangular panels that install in 24" module

• Available unperforated or M21 perforated for acoustical solutions

• Shapes install with pre-slotted standard Prelude® XL® 15/16" suspension system

• Durable factory-applied gasket ensures even reveals and highlights geometric designs

• Panels feature swing-down accessibility

• MetalWorks™ FASTPeel™ panels feature an easier-to-remove protective film

(new)

Now, Lighting Integration Made Easy
DOWNLIGHTING: MetalWorks™ Torsion Spring Shapes center cut panel with USAI® Lighting trimless downlight fixture. Integration details at armstrongceilings.com/downlighting

PHYSICAL DATA

Material
Aluminum – thickness 0.040"

Surface Finish
Factory-applied polyester paint
Custom colors and finishes available.

Fire Performance
Painted aluminum finishes:
Class A: ASTM E84. Flame Spread Index 25 or less.
Smoke Developed Index 50 or less.

2D panels are recommended for sprinkler integration, however local code official may approve sprinklers in 3D panels.

Acoustical Options
Perforated panels are supplied with a black fiberglass fleece to absorb sound.

Recycled Content
Minimum 25%. Up to 80% recycled content available.

Design Considerations
MetalWorks™ steel and aluminum panels are made at different manufacturing facilities that use different paint systems. Because of this, similar colors, i.e., White and Whitelume, are not exact color matches. Please consider this when designing adjacent spaces with multiple MetalWorks products.

While we strive to ensure exact color matches, various factors can affect how colors appear on ceiling and wall panels, suspension systems, and trim products. Items with the same finish name will coordinate but may not be an exact color match.

Panel face sits 1-1/2" inches below grid face. See installation instructions for further details about plenum height requirements.

M21 perforation covers entire face of panel with no unperforated border.

For optimum visual design, backlighting panels is not recommended. For lighting integration see installation instructions.

Sprinkler, lighting, and HVAC integration is covered in detail in the installation instructions.

MetalWorks Torsion Spring Shapes panels have a durable, factory-applied gasket surrounding all edges to maintain a consistent reveal between panels and to highlight the geometric pattern of the ceiling system. Gasketed Torsion Spring Shapes panels cannot be mixed with traditional non-gasketed Torsion Spring panels such as item 7209.

Seismic Restraint
MetalWorks Torsion Spring panels have been engineered, tested, and approved for application in all seismic areas when installed per Armstrong Ceilings installation instructions.

Warranty
One (1) year limited warranty. Details at armstrongceilings.com/warranty

Safety Considerations
⚠ Item number 8217H01 contains Rare Earth Neodymium Magnets. While these magnets are commonly used in commercial applications, individuals with pacemakers, ICD's, or other implanted medical devices must use caution as magnets can impact performance of these devices. Consult physician for specific details.

Weight

METALWORKS™ – Standard

LIGHTING SOLUTIONS
METALWORKS™ Torsion Spring Shapes
Center Cut Panels for Recessed Downlighting
smooth texture

MetalWorks Torsion Spring Shapes center cut panels with USAI® Lighting BeveLED® Mini for MetalWorks trimless square downlights

Pre-cut durable, metal ceiling panels are designed to seamlessly integrate with trimless downlights. Perfectly centered fixtures, perfectly cut tiles - every time.

KEY SELECTION ATTRIBUTES

- Perfectly centered USAI® Lighting fixtures for flush fit visual
- Time and labor savings solution – downlight fixtures are fully adjustable within the system so there is no cutting, no mess, and no need to remove panels
- Entire system helps contribute to healthier spaces, part of CleanAssure™ portfolio
- Clean, minimal trimless appearance in durable, factory-cut metal panels
- MetalWorks™ FASTPeel™ panels feature an easier-to-remove protective film
- Pre-engineered and tested for fit and finish in all seismic areas
- Center cut panels allow for perfectly centered lights within the panel. For offset factory-cut panels, contact ASQuote@armstrongceilings.com. Custom grid layouts are possible depending on lighting layout.
