Lines for a truly unique visual!

Tectum DesignArt – Lines Finale PB Rings, Arcs, Bands ceiling and wall panels in Polar, Marigold, Feldspar, and Mist

armstrongceilings.com/designart

Integrated furring strips and an acoustical infill reduce installation time and offer excellent sound absorption with one-of-a-kind visuals.

KEY SELECTION ATTRIBUTES

- Tectum® DesignArt™ – Lines Finale™ PB panels have UL® Certified acoustics with acoustical testing and reporting that align with industry-wide best practices
- Excellent sound absorption – NRC 0.85 (1" panel, D-20 mounting)
- Panels are manufactured with a plant-based binder infill and furring pieces to provide maximum sound control and install 2.5x faster than Direct-Attach for the same acoustic performance
- 29 standard routed panels for 24" × 24" and 24" × 48" Direct-Attach ceilings are available in 24 nature-inspired colors and Natural
- Products in the Tectum DesignArt portfolio are made to work together
- Precision routing of lines allows for seamless connections between compatible panel face designs
- Great retrofit solution for noise reduction
- CleanAssure™ family of products – includes disinfectable panels, suspension systems, and trim (standard colors only)
- Part of the Sustain® portfolio, and meeting the most stringent industry sustainability compliance standards today
- All panel edges and furring strips are painted; top face panel features beveled edges
- Variety of made-to-order color options available
- Touch up paint available for the 24 standard colors
- Available for ceiling applications
- Panels can be mechanically fastened to a wide variety of surfaces including masonry, drywall, drywall grid system, wood, and more
- USDA Biobased content: 98%
- Made in the U.S.A. of domestic and global content
- Build America, Buy America (BABA) Act compliant

DETAILS

1. Panel face with beveled and painted edges
2. Back of panel with factory-applied furring strips and acoustical infill

ACCESSORIES

Item No. ♦	Description	Quantity
5456GAL1 _ _ _	Touch up paint	1 gallon
8187L30TWH†	#8 x 3" Painted Head – Sharp point Screws	1000/CTN
8188L30TWH†	#8 x 3" Painted Head – Drill point Screws	1000/CTN
8189L32TWH	3-1/4" Painted Head – CMU Screws	500/CTN

♦ When specifying or ordering, include the appropriate 3-digit color suffix TNA = Natural; TPO = Polar (e.g. 5456GAL1 T P Q). Consult installation instructions for fastener guidance.

† Touch up paint is available to paint screw heads in field if desired or specified.

NOTE: Projects may require alternative screw lengths and types depending on site conditions. Please consult installation instructions for guidance.

PHYSICAL DATA

Material

Cementitious wood fiber panels with a fiberglass plant-based binder infill.; FSC® certified. For more information about FSC-certified fire-retardant products, or to view our FSC-certification letter, contact TechLine at 1 877 276-7876.

Surface Finish

Factory-applied latex paint on abuse-resistant silicate surface coating. Natural finish is unpainted but, after coating is applied, panels may appear light in color.

Panel are painted on the edge, however due to fibrous texture of panels, certain angles and lighting conditions will make edge appear less or more painted.

Can be field painted up to 6 times without impacting acoustic or fire performance. See installation instructions for details on paint and application method.

Fire Performance

Class A. Flame Spread Index 25 or less and Smoke Developed Index 50 or less when tested in accordance with ASTM E84.

CAN/ULC S102 surface burning characteristics. Flame Spread Index of 25 or less and Smoke Developed Index of 50 or less (painted, face only).

VOC Emissions

Third-party certified compliant with California Department of Public Health CDPH/EHLB/Standard Method Version 1.2, 2017. This standard is the guideline for low emissions in LEED®, WELL Building Standard®, CalGreen Title 24, ANSI/ASHRAE/USGBC/IES Standard 189; ANSI/GBI Green Building Assessment Protocol.

Humidity/Sag Resistance

HumiGuard® Plus performance panels are recommended for areas subject to high humidity, up to, but not including, standing water and outdoor applications.

Anti-Mold/Mildew

Panel with BioBlock® performance resist the growth of mold and mildew on the panel surface.

Installation Considerations

Panel must be mechanically attached to approved substrate per installation instructions. Acoustical performance varies by mounting method; panels must be installed as directed to achieve published NRC values.

Use caution and wear appropriate hand, eye, and dust mask protection when cutting and installing Tectum ceiling panels. Refer to installation instructions for complete details and cutting recommendations.

Primary (Embodied) Energy

See all LCA information on our EPDs.

Application Considerations

Low angle lighting exaggerates variation inherent to the manufacturing process and is not recommended for Tectum installations.

Design Considerations

Color variation among panels is common due to the natural characteristics of the wood.

Wood fibers may appear orange on natural-colored panels due to the characteristics of the wood.

Physical product samples for standard and custom colors are available upon request. Please refer to the physical product sample prior to making a final selection. While we strive to ensure exact color matches, various factors such as differences in materials, texture, substrate porosity, painting processes, lighting, and observer subjectivity can all affect how paint colors appear on ceiling and wall panels, suspension systems, and trim products. Due to these and other differences, ceiling and wall panels, trim products, and suspension systems with the same color name will coordinate but may not be an exact color match. Product is dye-lotted. Order sufficient initial quantities and attic stock to minimize possible color variation.

Design & Pre-Construction Service
