WoodWorks® Linear Veneered Closed nominal 6" × 96" planks with a beveled edge profile in Quartered Walnut

Standard linear design with three edge profile options offer a variety of visuals that are easy to spec and order.

KEY SELECTION ATTRIBUTES

- Standard veneered planks in two widths: nominal 4" and 6" wide with three edge profiles: notched, beveled, and square (no reveal)
- Standard veneers feature various species and cuts for beautiful wood visuals
- ASTM E84 Class A Fire Performance
- The natural warmth of wood can contribute to biophilic designs and building certification standards like the WELL™ v2 "Nature and Place" feature
- Select products included in the FAST134 program – ready to ship in 4 weeks or less
- Complete standard system from one manufacturer, including panels, suspension system, clips, and trim options
- USDA Biobased content: 100%
- FSC® certified wood available as a premium option (FSC® C007626)
- CleanAssure™ family of products includes disinfectable panels, suspension systems, and trim
- Made in the U.S.A. of domestic and global content
- Build America, Buy America (BABA) Act compliant

	AX_VESTR_ _ _	Axiom Vector Straight Trim – Recommend in Black 6" and up	N/A	Silver Grey, Black, Gun Metal	10 LF
	AX_VECUR_ _ _	Axiom Vector Curved Trim – Recommend in Black 6" and up	N/A	Silver Grey, Black, Gun Metal	10 LF
	6408_ _ _	WoodWorks Edgebanding Coordinating Faux Wood	3/4" × 300"	All Veneers	25 LF
FSC-certified Premium Trim*	6481F02W1H4_ _ _	4" FSC Veneered Trim with 4 Clips – Item 5925 (With Faux Wood Edgebanding on Long Edges)	4 × 96 × 3/4"	All Veneers	N/A
	6481F02W1H6_ _ _	6" FSC Veneered Trim with 4 Clips – Item 5925 (With Faux Wood Edgebanding on long edges)	6 × 96 × 3/4"	All Veneers	N/A
	6481F02W1H8_ _ _	8" FSC Veneered Trim with 4 Clips – Item 5925 (With Faux Wood Edgebanding on Long Edges)	8 × 96 × 3/4"	All Veneers	N/A

When ordering suspension system materials, please note that this product requires Prelude® XL® HD (Heavy-duty) 15/16" main beams.

♦♦ When specifying or ordering please include the 3-letter veneer suffix that coordinates with your WoodWorks ceiling: (e.g., 6481F01W1H4 N W M).
NOTE: Refer to installation instructions at armstrongceilings.com/installation for a better understanding of suspension system requirements.

③ Veneered Perimeter Trim

PHYSICAL DATA

Material

Fire-rated particle board (FRPB) with real wood veneers.
Vertical Grain Fir (NVF) is FRPB with a reconstituted veneer.

Surface Finish

Clear or tinted semi-gloss coating.

Fire Performance

Class A: ASTM E84 surface burning characteristics.
Flame Spread Index 25 or less. Smoke Developed Index 50 or less.

CAN/ULC S102 surface burning characteristics.

Linear wood, as with other architectural features located at the ceiling, may obstruct or skew the planned fire sprinkler water distribution pattern, or possibly delay or accelerate the activation of the sprinkler or fire detection systems by channeling heat from a fire either toward or away from the device. Designers and installers are advised to consult a fire protection engineer, NFPA 13, and local codes for guidance where automatic fire detection and suppression systems are present.

ASTM E1264 Classification

Type XX; Pattern: Z; Class A

Application Considerations

Variation among panels may occur due to the natural characteristics of the wood and grain.

It is very important that WoodWorks planks are climatized prior to installation. Relative humidity between 25% and 55%, and temperatures between 50°F and 86°F, must be maintained.

Design Considerations

Unfinished particle board will be visible between planks with notched and beveled edges.

The notched or beveled edge profiles are recommended for installations with minimal ceiling heights and/or low angle lighting to reduce the potential for lipping or noticeable height variances between panels.

Specification Consideration

Attention: For FSC® certified wood products to maintain their CoC certification, products must be sold to a CoC certified distributor or directly to the installing contractor. Failure to do so breaks the CoC.

Installation Considerations

Installation can use staggered, random joints for a monolithic appearance or consistent lengths for a modular style. For expansion, a 3/4" gap is required at every 24-foot run of plank. See installation instructions BPLA-293440 at armstrongceilings.com/installation.

Seismic Restraint

WoodWorks Linear Veneered Closed planks have been engineered, tested, and approved for application in all seismic areas when installed per Armstrong Ceilings installation instructions.

Cleaning and Disinfecting

Cleaning and CDC-approved disinfecting options available on armstrongceilings.com/cleaning

FAST134 Program Considerations

Size of Job Matters: Big jobs, over 2500 SF or 50 pieces for shapes/vertical elements will have longer lead times.

Location Matters: Transit time not included. We are ready to ship in 1 week on FAST1 items. However, transit to the states west of Wyoming may add time.

Distributor Truck Schedule Matters: We rely on distribution to help move products around the country. When speed matters, work with your local distributor to ensure FAST134 service.

Stock vs. Made-to-Order Matters: FAST3 & FAST4 items are made-to-order and will ship direct to distributor. FAST1 (stocked items) will go through distribution and depend on distributor truck schedules.
