## **Armstrong Ceiling & Wall Solutions Expands Custom Metal Portfolio with Acquisition of Móz Designs, Inc.**

*New custom metal finishing and coating capabilities add depth and movement to  
interior and exterior applications*

LANCASTER, Pa. – Armstrong Ceiling & Wall Solutions has acquired Móz Designs, Inc., a designer and fabricator of custom architectural metal ceilings, walls, dividers, and column covers for interior and exterior applications.

As a wholly-owned subsidiary of Armstrong, Móz will retain its company name and brand and current organizational structure, operating independently but collaboratively with Armstrong.

Móz combines custom perforations, engraving, high-end metal finishes and forming to produce rich, artistic visuals with depth and movement, collaborating with architects and

designers to make their vision a reality. With this new capability, Armstrong enriches its leading portfolio of metal ceiling and wall solutions.

Móz uses predominately aluminum, one of the most sustainable materials in the world, to fashion its products. According to the Aluminum Association, aluminum is infinitely recyclable and reuse is easy and economical; nearly 75% of all aluminum ever produced is still in use today. Recycling aluminum uses 95% less energy and produces 95% less greenhouse gas emissions than making metal from new materials.

“The metal category has been a growing category for us and with the renewed interest in cleanable surfaces and partitions offers even greater opportunity,” states Vic Grizzle, CEO, Armstrong World Industries. “Metal is easy to clean and sustainable, and Móz, in particular, offers sought-after custom design elements to complement any space.

“We are also excited about Móz’s new acrylic pursuits, demonstrating the incredible agility of the business to respond quickly to market demand for healthier spaces. Both the metal and acrylic solutions align perfectly with Armstrong and our purpose: to make a positive difference in spaces where we all live, work, learn, heal and play...more important than ever right now,” he adds.

### **New Acrylic Solutions As Well**

Móz Designs acrylic dividers add to the broader portfolio of ceiling and wall products Armstrong offers to meet the need for healthier and safer spaces. The portfolio also includes Armstrong™ Infusions Resilient Partitions and Wrap and Solo Screens from Turf Design.
