DUNE® with Peakform Prelude 24mm Exposed Tee Grid

**BENEFITS**

- Re-engineered edge treatment, for better fit & less scrap
- Simplified installation (only one rated), effective for transport and installation, and easier to install
- Non-directional visual plus full edge coating, contributes to real monolithic visual
- Graceful curved surface, nice and economical ceiling solution
- Sanded to create aesthetic visual effect for office
- Good sound absorption & High light reflectance
- Excellent acoustic performance
- Durability: Scratch resistance
- Durability: Scratch resistance
- Ceilings qualify for LEED credits
- Non-asbestos: Not asbestos

**APPLICATION AREAS**

- Office
- Education
- Healthcare
- Retail & Hospitality

-Inspiring Great Spaces® - Armstrong CEILING SOLUTIONS
### Panel Options  
#### 天花板选择

### Design Considerations
- **US Class A- Flame Spread 25 or under A**  
- **BS476 part 6 & 7 Class 0 / Class 1**  
- **GB6582-2012 B1 中国标准B1**

According to GB50222, the mineral fiber panel of fire rating Class B1 is a Grade A building material when being installed with steel grid. 

Installation is performed on the architectural surface with corresponding support. 

To prevent condensation, the installation depth is defined by the rule of thumb: 

- **R Factor - 1.5 (BTU units)**: 3.8 kgs/m² (0.78 lbs/SM)  
- **R Factor - 0.26 (Watts units)**: 3.8 千克平方米/米（0.78 磅/平方英尺）

### Material Information

#### Material  
- Wet-formed mineral fiber  
- Suspension mineral fiber

#### Surface Finish  
- Surface-applied latex paint  
- Powdered mineral fiber

#### Warranty  
- 10 years limited warranty
- 30 years limited warranty

### LEED Certification

#### LEED  
- LEED for Commercial Interiors
