** Adding acoustical infill (item R230T10, 5479, or 5823) for 4-1/2" module increases the NRC to 0.60. Adding acoustical fiberglass infill for 6" module increases the NRC to 0.45; adding BioAcoustic™ infill 5479 increases NRC to 0.50. For additional infill options, refer to the Acoustical Infill Panels catalog page 253.

### TRIM AND ACOUSTICAL INFILL PANELS

### PHYSICAL DATA

**Material:** Fire-retardant particle board with face-cut veneers. FSC®-certified fire-retardant particle board with face-cut veneers (RA-COC-003601). For more information about FSC®-certified products or to view our FSC®-certification letter, visit armstrongceilings.com/woodworks.

**Factory-applied black fleece on each plank to cover the reveal.**

**Surface Finish:** Clear or tinted semigloss coating

**Fire Performance:**
- ASTM E84 surface burning characteristics. Flame Spread Index 25 or less. Smoke Developed Index 50 or less.
- CAN/ULC S102 surface burning characteristics. Flame Spread Rating 25 or less. Smoke Developed Classification 50 or less.
- Linear wood, as with other architectural features located at the ceiling, may obstruct or skew the planned fire sprinkler water distribution pattern, or possibly delay or accelerate the activation of the sprinkler or fire detection systems by channeling heat from a fire either toward or away from the device. Designers and installers are advised to consult a fire protection engineer, NFPA 13, and local codes for guidance where automatic fire detection and suppression systems are present.

**ASTM E1264 Classification**
- Composite – Fire Class A

**Application Considerations**
- Variation among panels may occur due to the natural characteristics of the wood and grain. It is very important that WoodWorks® planks are climatized toward or away from the device. Designers and installers are advised to consult a fire protection engineer, NFPA 13, and local codes for guidance where automatic fire detection and suppression systems are present.

**Specification Consideration**
- Attention: For FSC-certified wood products to maintain their CoC certification, products must be sold to a CoC certified distributor or directly to the installing contractor. Failure to do so breaks the CoC.

**LEED®** is a registered trademark of the U.S. Green Building Council. Rainforest Alliance Certified™ is a trademark of Rainforest Alliance.

**Seismic Restraint**
WoodWorks Linear planks have been engineered, tested, and approved for application in all seismic areas when installed per Armstrong Ceilings installation instructions.

**Warranty**
