WOODWORKS® Linear
Veneered Planks

Standard, easy-to-install wood veneer planks offer a variety of installation options.

KEY SELECTION ATTRIBUTES

Veneered Planks
- Standard wood planks in two widths: nominal 4-1/2” and 6” modules, with traditional 3/4” reveals
- Standard factory-applied acoustic fleece
- Installation system allows for installation on the ceiling, wall, at 90º angle, or in a curved ceiling-to-wall transitions (one-foot minimum radius)

- Create upturns for continuous visuals and clouds with veneer-wrapped WoodWorks trim
- Suspension system and planks from one manufacturer; improved for 30-50% faster installation
- USDA Certified Biobased Product, 100%

VENEERS
Due to printing limitations, shade may vary from actual product.

Natural Variations™ (Real Wood Veneers)
- Beech (NBE)
- Maple (NMP)
- Light Cherry (NLC)
- Dark Cherry (NDC)

Constants™ (Real Wood Veneers)
- Maple (CMA)
- Cherry (CCY)
- Walnut (CWA)
- Redux Wood Wheat (CRW)

Bamboo* (Real Wood Veneers)
- Patina (BAP)
- Native (BAN)
- Custom Veneers Available

* Veneer is rapidly renewable. Bamboo is a grass that only requires 3-7 years for maturity and does not have to be replanted after each harvest.

Physical Data

Material: Fire-retardant particle board with face-cut veneers. FSC®-certified fire-retardant particle board with face-cut veneers (RA-COC-003601). For more information about FSC®-certified products or to view our FSC®-certification letter, visit armstrongceilings.com/woodworks

Factory-applied black fleece on each plank to cover the reveal.

Surface Finish: Clear or tinted semi-gloss coating

Fire Performance: ASTM E84 surface burning characteristics. Flame Spread Index 25 or less. Smoke Developed Index 50 or less.

CAN/ULC S102 surface burning characteristics. Flame Spread Rating 25 or less. Smoke Developed Rating 50 or less.

Linear wood, as with other architectural features located at the ceiling, may obstruct or skew the planned fire sprinkler water distribution pattern, or possibly delay or accelerate the activation of the sprinkler or fire detection systems by channeling heat from a fire either toward or away from the device. Designers and installers are advised to consult a fire protection engineer, NFPA 13, and local codes for guidance where automatic fire detection and suppression systems are present.

ASTM E1264 Classification: Composite – Fire Class A

Application Considerations: Variation among panels may occur due to the natural characteristics of the wood and grain. It is very important that WoodWorks® planks are climatized prior to installation. Relative humidity between 25% and 55%, and temperatures between 50°F and 86°F, must be maintained.

Specification Consideration: Attention: For FSC®-certified wood products to maintain their CoC certification, products must be sold to a CoC certified distributor or directly to the installing contractor. Failure to do so breaks the CoC.
