New seamless acoustical ceiling system offering monolithic visual and Total Acoustics® performance.

KEY SELECTION ATTRIBUTES

- Look of drywall in a seamless acoustical ceiling
- Get total noise control and floor plan versatility with Total Acoustics® ceiling panel options: NRC + CAC = Total Acoustics Performance™
- Finished white ACOUSTIBuilt™ panels are part of the Sustain® portfolio and meet the most stringent sustainability compliance standards today
- Smooth non-directional, monolithic, drywall-like visual
- Now add a hint of color, tailored to your design palette
- Installed system achieves acoustical performance of up to NRC 0.70 and CAC 48
- USDA Certified Biobased Product, 95%
- Quick, easy panel installation using Armstrong® Drywall Grid
- Install with ShortSpan® Drywall Framing System for a faster, easier way to frame flat drywall ceilings up to 17° wide
- ACOUSTIBuilt is intended for spaces desiring a Level 4 equivalent drywall finish
- Easier to install than acoustical plaster at a lower cost
- Create designs with sloped installations under 20°
- Can be installed with most drywall compatible light fixtures including those fixtures from our partners:
  - Axis
  - XAL
  - USAI
  - Price

FINE TEXTURE FINISH FOR ACOUSTIBuilt™ PANELS

OFF-WHITE TINTS OF YOUR CHOICE

NOTE: These are examples of tints you can specify to add a hint of color to our white base.

TYPICAL APPLICATIONS

- Offices
- Lobbies
- Education
- Exposed Structure
- Retail
- Hospitality

Available in any off-white tint!

ACOUSTIBuilt™
Seamless Acoustical Ceiling System
fine texture

ASSEMBLY AND INSTALLATION OVERVIEW

1. Attach ACOUSTIBuilt™ Panels to Armstrong® Drywall Grid with Screws and Grip-Plate® Washers
2. Finish Taped Joints and Washers with Compound
3. Spray-apply Fine Texture Finish for ACOUSTIBuilt™

PHYSICAL DATA

Material
Wet-formed mineral fiber

Fire Performance
Class A; ASTM E84 and CAN/ULC S102 surface burning characteristics. Flame Spread Index 25 or less. Smoke Developed Index 50 or less.

ASTM E1264 Classification
Type IV, Form 2, Pattern G
Fire Class A

Humidity/Sag Resistance
HumiGuard® Plus ceiling panels are recommended for areas subject to high humidity, up to, but not including, standing water and outdoor applications.

Mold/Mildew Protection
Panels with White Fine Texture Finish offer BioBlock® performance and resist the growth of mold and mildew.

High Recycled Content
Contains greater than 50% total recycled content. Total recycled content based on product composition of post-consumer and pre-consumer (post-industrial) recycled content per FTC guidelines.

VOC Emissions
GREENGUARD Gold Certified
Third-party certified compliant with California Department of Public Health CPR/EBL Standard Method Version 1.1, 2010. This standard is the guideline for low emissions in LEED, CalGreen Title 24, ANSI/ASHRAE/USGBC/IES Standard 189; ANSI/GBI Green Building Assessment Protocol (White only).

Design and Lighting Considerations
ACOUSTIBuilt™ is intended for spaces desiring a Level 4 equivalent drywall finish. Critical lighting conditions such as grazing or side light are important to consider while specifying as they can accentuate any imperfections or visible joints.

Lighting and diffuser fixtures must be able to accommodate 7/8” thick panels. Contact the lighting and diffuser manufacturers for recommended fixture use and integration. ACOUSTIBuilt™ is a non-accessible ceiling. Access panels can be integrated as needed following standard installation practices. Refer to access panel manufacturer to verify compatibility with 7/8” thick panels.

Acoustical Considerations
Unfinished ACOUSTIBuilt™ panels are UL® classified as an 0.80 NRC. Following the installation instructions, joint compound is field applied to at least 30% of the system before Fine Texture Finish is spray applied. Depending on the layout of the room and fixtures, the expected system performance is up to a 0.70 NRC. Excessive integrations and/or small enclosed spaces where the ceiling is more compound than open area will result in degradation of sound absorption. Certain lighting conditions and/or colors may require an additional coat of Fine Texture Finish, resulting in a degradation of sound absorption. ACOUSTIBuilt™ panels absorb the most sound when installed as full panels. Plan the layout to minimize panel joints and fixture integrations which cover the surface of the ceiling.

Insulation Value
R Factor – 2.2 (BTU Units)
R Factor – 0.39 (Watts Units)

10-Year Panel Warranty
