SHORTSPAN®
FRAMING SYSTEMS

Inspiring Great Spaces®

Armstrong®
CEILING SOLUTIONS
FASTER. EASIER. BETTER.

Armstrong® Drywall Framing Systems install faster than traditional methods, which helps you complete jobs under cost and ahead of schedule.

Our Drywall Systems are manufactured to meet or exceed ASTM standards and code requirements and are engineered to provide economical alternatives to stud and track construction.

We provide pre-engineered solutions for direct-to-deck installations, vertical drops, and short spans. This makes Armstrong ShortSpan® Drywall Framing perfect for use in corridors, small room configurations, restrooms, and storage closets.

Armstrong systems provide superior performance when compared to traditional methods. Our pre-engineered systems are tested for fit and finish and are engineered to be code compliant. When you specify Armstrong, you’re assured a top quality product that reduces risk.

DRYWALL Grid Systems

Code Compliance You Can Trust

Meets:
- ASTM C635
- ASTM C841
- ASTM C926
- ASTM C636
- ASTM C754
- ASTM C840
- ASTM C842
- ASTM C645 requirement for minimum metal thickness to .0179” for screw pullout
- ICC-ES: ESR-2311 Evaluation of Code Compliance
- ICC-ES: ESR-1289 Evaluation of Code Compliance
- IAPMO: ER-163: Evaluation of Code Compliance
- Department of State Architect – DSA PA105
- City of LA – RR 5348
- 26 UL Fire Resistant Designs

Performance
- PeakForm® Eliminate hanger wires for spans up to 8’ – 6”
- Select items available in High Recycled Content (HRC): 61% Total Recycled Content, 53% Post Consumer Content, 8% Pre-Consumer Content
- Non-HRC items have 30% recycled content
- Components meet broad range of UL design assemblies (ShortSpan® Tee, LAM, SB12)
• G40, 0.018” metal thickness meets ASTM C645
• G90 hot dipped galvanized coating available for interior high moisture areas.
• ScrewStop™ reverse hem prevents screw spin off
• Rotary stitching on double web adds strength and stability
• Deep knurled surface for easy screw insertion

**Locking Pocket Mains**

- Locking Pocket Main has the same characteristics as a Strongback Locking Angle Mold.
- Locking Pocket Main eliminates measuring, marking and screwing at perimeters.
- 16˝ for hanging this system.

**Vertical Supports**

- Vertical Supports to structure should be either QuikStix Uptight Clips or stiff legs using scrap metal.
- Wire is pre-drilled screw holes 1-3/4˝ wide.

**S7708P**

- QuikStix™ Drywall Ceiling Components

</tr>
<tr>
<td>Reduce Risk:</td>
<td>System was evaluated using full scale seismic testing and may be an acceptable solution on your next project. Check with your local code official for approval prior to installations. For official test reports, please contact TechLine at 877 276 7876.</td>
</tr>
</tbody>
</table>

SHORTSPAN FRAMING TEES ARE ENGINEERED FOR FASTER, EASIER INSTALLATION

- 1-1/2” wide face exceeds the minimum industry standard
- ScrewStop™ reverse hem prevents screw spin-off
- Balanced profile stays flat during installation
- Rotary stitching on double web adds strength and stability
- Deep knurled surface for easy screw insertion
- G40, .018” metal thickness meets ASTM C645

Reduce Labor Cost: Eliminates screws, cross tees and hanger wire (in most applications)
Reduce Material Cost: Economical price point on components
Reduce Waste: Standard and custom lengths – and there are no cartons to throw away
Reduce Risk: System was evaluated using full scale seismic testing and may be an acceptable solution on your next project. Check with your local code official for approval prior to installations. For official test reports, please contact TechLine at 877 276 7876.

NO CARDBOARD CARTONS

- Reduced clean-up and waste at jobsite
- Quick to open
- Chop saw to length
• Knockouts 8” O.C. eliminates measuring, screwing, and splicing
• Allows vertical supports at 4’ O.C. instead of 24" or 16"
• Reduces lateral movement
• Resists upward movement if used with vertical tee post or stud
• Easier to level system compared to traditional framing

For more information, call 877 276-7876

INSTALLATION RECOMMENDATIONS

1 Install Locking Angle Molding (LAM12) on walls
2 Lock in ShortSpan tees (577XXP) into LAM12
3 Flattened bulb allows StrongBack to slide over bulb
4 Slide StrongBack into place – no bending of tab required

ALTERNATIVE METHOD TO INSTALL STRONGBACK

1 Open StrongBack (SB12P) lock tabs with pliers (easier if performed on floor)
2 Slide StrongBack over bulb of ShortSpan tee and engage by bending lock tabs back to original position
3 Support and level system to structure; attach vertical supports to StrongBack as required
4 To provide stability to StrongBack, it is recommended to bend first 4” to 90° and pin to wall
TIME SAVING SOLUTION FOR CONGESTED PLENUM INSTALLATIONS

- Eliminates the need for hanger wire
- Gussets and mounting rail provide alternative method of grid attachment when straight drops for hanger wire are not possible
- Reduced labor costs over conventional installation methods in congested plenum
- Alignment crimps at locking tabs for fast, easy alignment

12" Locking Angle Molding (LAM12) – Wall angle molding fabricated from hot dipped galvanized steel. The molding features patented locking details at 8" centers that lock and hold the ShortSpan framing tees.

ShortSpan:

1. ShortSpan tees must be cut within 1/8” of the vertical leg of the Locking Angle Moldings (for non-rated installations only).

2. Must screw LAM to wall structure (#8 x 1-1/4” wafer head self drill sheet metal screws tested in 25- and 20- gauge steel studs).

   Assembly tested to 200 lbs. for shear and screw pullout without failure (refer to Maximum Load chart on page 11).

3. Insert right hand flange of tee into pocket “A” first and allow left flange to clear pocket “B” and rest on angle molding. Slide tee to the left to engage in pocket “B” (audible click).

No Additional Requirements For Seismic Areas

There’s no need to screw ShortSpan Tees to Locking Angle Molding in Seismic Design Categories A-F (unless required by local code).

*Patent Pending*

- Pre-engineered locking tabs punched 8" O.C.:
  - Eliminates measuring 16" or 24"
  - Locking tabs prevent lateral and upward movement
  - Eliminates screws, pop rivets, or crimpers needed to attach tees to molding
- Knurled surface on both flanges
- ScrewStop™ reverse hem prevents screw spin-off and provides safer handling
- Alignment crimp at locking tabs for fast, easy alignment
- Locking Angle Molding is designed to only work with Armstrong ShortSpan products
Knurled Angle Molding (KAM) for Drywall Framing has the time saving advantages of knurling, ScrewStop™, pre-punched holes, and no cartons to throw away.

<table>
<thead>
<tr>
<th>Feature</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Knurling:</td>
<td>Helps the screws to grab quickly</td>
</tr>
<tr>
<td>ScrewStop:</td>
<td>A reverse hem on the top and bottom flanges will catch the screw and prevent it from slipping off the wall angle. No sharp edges on the top or bottom of the angle.</td>
</tr>
<tr>
<td>Pre-punched Holes:</td>
<td>Located on the top edge to allow for faster insertion of the screws.</td>
</tr>
<tr>
<td>No Carton Packaging:</td>
<td>Eliminate time needed to open and throw away cartons. Just cut the plastic strap and go.</td>
</tr>
</tbody>
</table>

- Available with a 1-1/4", 1-1/2" or 2" face to meet your specific need
- 2" KAM is available in 0.030", 0.027", and 0.018" metal thickness
- 1-1/2" KAM is available in 0.030", 0.027", and 0.018" metal thickness
- 1-1/2" KAM is available in 10' or 12' lengths
- 1-1/4" KAM is available in 10' or 12' lengths
- Top and bottom flanges are hemmed for easy handling, unlike the sharp flanges on competitor moldings
- ScrewStop reverse hem catches screws, preventing them from slipping off the wall angle
- Pre-punched holes on the top edge (4" O.C.) allow for faster screw insertion
• Reduces time and labor installing drywall ceilings in tight plenum conditions
• Uptight clip allows installation in 1-1/2" to 5-1/2" plenums
• Locking Pocket Main has the same characteristics as StrongBack™
• Locking Pocket Main allows uptight installation since it is installed at the same level as the ShortSpan tees
• ShortSpan Tees can span up to 8'-6" without vertical support (16" O.C.)
• Locking Angle Mold eliminates measuring, marking and screwing at perimeters

*Patent Pending

NOTE: 5/8" drywall weighs 2.4 lbs/SF or less
1/2" drywall weighs 2.0 lbs/SF or less
Fixtures should be independently supported
*For other combinations; consult TechLine at 877 276-7876

INSTALLATION RECOMMENDATIONS

1 Vertical supports to structure should be either QuikStix Uptight Clips or stiff legs using scrap metal. Wire is NOT recommended for hanging this system.

2 ShortSpan tees must be cut within 1/8" of vertical leg of the Locking Angle Moldings and Locking Pocket Mains.

3 To engage ShortSpan tees into Locking Pockets: insert right hand flange of tee into long pocket first and allow left flange to clear short pocket; rest flat. Slide tee to the left to engage in short pocket (audible click).

Uptight Clip (QSUTC): Saves Time in Tight Plenum Areas and is Adjustable to Uneven Surfaces
REDUCES TIME AND LABOR WHEN INSTALLING VERTICAL DROPS

- Knockouts at 6" or 8" centers reduces cutting time
- Alignment holes make screw installation simple and forms perfect 30°, 45°, 60°, 75° and 90° angles
- Flattened bulb to allow true angles without interference; bending crimp prevents misalignment
- 90-degree angle fits Locking Angle Molding (LAM12)
- Rout holes 6"(QS612) and 8"(QS812) O.C. allows use of XL8926, XL7936, XL8945P or XL8965 cross tees for 2', 3', 4', or 6' section spans
